

Tech Deck

Business Edition

Built for organisations to - Run leaner & grow smarter

Reduce costs. Strengthen systems. Unlock capacity for growth.
100% of our profits fund free to access mental health support.

You're probably paying for more tech than you need

Overcomplicated systems. Long contracts. Poor service. Rising costs that quietly eat into your margins.

Sound familiar?

For many businesses, technology becomes a growing overhead - but not always a strategic advantage.

Money that could be driving growth is tied up in:

- Overpriced, underused systems • Unnecessary licences
- Inefficient suppliers • Outdated contracts

We get It - because we've seen It first-hand

We work across organisations dealing with:

- Rapid Growth • Operational Complexity
- Rising cost pressures • Supply chain data security requirements

We've seen how quickly systems become bloated - and how difficult it is to unwind them.

So we built a different approach.

Tech, done differently

Technology that works, without the waste

- Tech Deck is built around a simple principle: *start with what you don't need*.
- We strip away unnecessary cost, complexity, and duplication - leaving you with technology that works efficiently, is secure and supports your growth.

What that means for you

- Immediate costs savings.
- Simpler, more effective systems.
- No unnecessary tools or licences.
- Technology aligned to how your business actually operates.

And when you need support

- You won't be routed through a call centre.
- You'll speak directly to people who understand your setup, your priorities, and your business.
- Issues are resolved quickly - often before they escalate.

Why this matters

Efficiency and security drives growth

Technology should enable your business - not slow it down

When systems are outdated and overly complex:

- Margins are reduced
- Time is wasted
- Growth is restricted

Create spaces
where people **feel**
able to talk, feel
heard, and access
the help they need.

Tech Deck Helps You

- Reduce operational overhead.
- Improve efficiency across teams.
- Reassure the upward supply chain of data security.
- Create capacity to reinvest into growth.

The Real Impact

Every pound saved is a pound that can be reinvested into:

- Hiring
- Marketing
- Product or Service development

About us

Experience that makes the difference

Our teams have worked across organisations of all sizes - from household brands to local enterprises - so we know what works, what doesn't, and how to make technology deliver real value for you.

We've seen the over complication, SaaS that is too broad and data security that's not fit for purpose - and we know how to strip it back.

We're Mental Health 360

We are a charity and since 2003 we've delivered mental health support

But demand continues to grow - and traditional funding alone isn't enough.

That's why we've evolved. Diversifying income into sustainable generation, we've developed high-quality traded services that directly fund and expand our work.

Tech Deck is one part of that model, alongside Growth, Ignite and HR Decks, all designed to help organisations strengthen, scale, and maximise revenue.

With Tech Deck, your investment doesn't just improve your business - it directly supports people and communities. 100% of profits invested in free mental health support.

In their words

The saving of nearly £15,000 gave us capacity to invest back into growth.

It was eye-opening how much we'd been overpaying.

We can now tender with confidence in data security.

It simplified everything, and freed up time immediately.

Tech that works.
People who respond.

Let's identify what you don't need.

No jargon. No hard sell. Just honesty.
