

Tech Deck

Built for the third sector, by the third sector.

Reduce costs. Strengthen systems. Release funds into your mission.
100% of our profits fund mental health support.

You're probably paying for more tech than you need

Overcomplicated systems. Long contracts.
Poor service. Rising costs.

Sound familiar?

For many charities, technology has become an unavoidable expense - but not always a valuable one.

Money that could be funding frontline services is tied up in systems that are overpriced, underused, or unnecessarily complex.

We get it - because we're one of you

We're a charity too - and we also deliver tech.

We've experienced the same pressures: limited budgets, increasing expectations, and the need to do more with less.

So we changed the model.

Our Mission:

To help charities maximise income, strengthen resilience, and expand their impact in an increasingly challenging funding environment.

Tech, done differently

Technology that works, without the fuss

- Tech Deck is built around a simple principle: *start with what you don't need*.
- We strip away unnecessary cost, complexity, and contracts - leaving you with technology that works, and a budget that goes further.

What that means for you

- Immediate costs savings.
- Strengthened compliance and Data Management.
- Simpler, more effective systems.
- No unnecessary tools or licences.
- Technology aligned to how you actually operate.

And when you need support

- You won't be routed through a call centre.
- You'll speak directly to people who understand your setup, your priorities, and your pressures.
- Often resolving issues before they become problems.

Why this matters

Technology that protects your mission

You're expected to deliver more, with less - while meeting increasing expectations around data protection, cyber security, compliance and accessibility.

At the same time, prices are rising.

Tech Deck Helps You

- Reduce unnecessary spend and free up budget immediately
- Meet funder expectations around security and compliance
- Keep systems reliable, secure, and easy to manage
- Protect sensitive data, donor information, and operations

The Real Impact

Every pound saved on technology is a pound that can be redirected into front line services.

**Create spaces where
people feel able to talk,
feel heard, and access
the help they need.**

About us

Experience that makes the difference

Our teams have worked across organisations of all sizes - from household brands to local enterprises - so we know what works, what doesn't, and how to make technology deliver real value for you.

We've seen the trends, the fads, and the overcomplicated solutions - and we've learned how to strip them back to what really matters.

We're Mental Health 360

Since 2003 we've delivered mental health support to communities. But demand continues to grow - and traditional funding alone isn't enough.

That's why we've evolved. Diversifying income into sustainable generation, we've developed high-quality traded services that directly fund and expand our work.

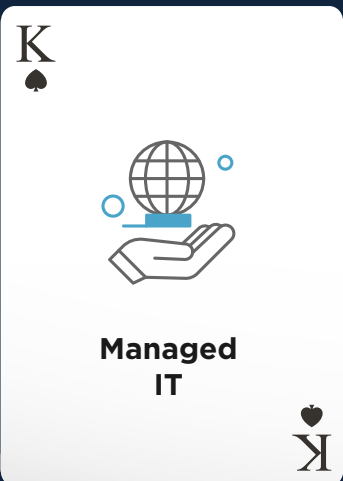

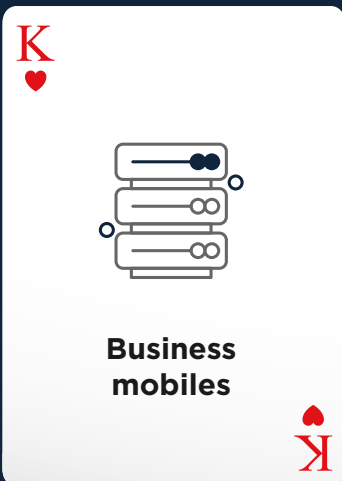

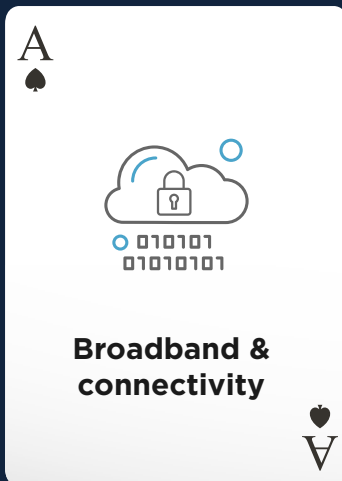

Tech Deck is one part of that traded income, alongside Sustain Deck for Income and Marketing support, HR and Financial services, all designed from first hand experience.

With Tech Deck, your spend doesn't just pay for technology - it keeps people supported and communities thriving.

Our Services

Flexible solutions, built around you

We offer five core services - but we don't assume you need them all in one go.

 Cyber security Protect your systems and data. Website security.	 Phone systems Reliable communications. User friendly. Programmed and installed. In their words

The saving of nearly £15,000 funds 500 counseling sessions.

It was eye-opening how much we'd been overpaying.

It means we can meet commissioners data security criteria.

It was easy.

Tech that works.
People who answer.

Let's identify what you don't need.

No jargon. No hard sell. Just honesty.
